

Internationally recognised  
Intensive data protection course

# GDPR DATA PRIVACY PROFESSIONAL COURSE

Organized by Data Privacy Office

## WHY TO LEARN?

Nevertheless, GDPR came into force in 2018, there are lots of questions. We are sure, you can find yourself in such questions:

Do we make the right steps  
in data protection?

01

Don't we violate the  
Regulation?

02

Why do clients request to  
delete data?

03

These and other situations are a sign that it is time to take the GDPR into consideration. Data privacy is a rather serious topic, any mistake can lead to millions in fines and lose a company's reputation. But only if the company does not have a professional who protect companies from paying fines and data breaches and make business friendly for clients.
